

**Sparkle is the Secure Connectivity & Digital Solutions Provider of reference in the Mediterranean Region**

**about Sparkle Greece**

Sparkle Greece, formerly known as Mediterranean Nautilus Greece, is part of Sparkle Group, a leading global telecommunication provider of IP, Data, Cloud, Data Center, Mobile and Voice solutions through a state-of-the-art backbone of around 540,000 km worldwide. Sparkle's Mediterranean submarine network spans over a distance of approximately 11,000 km connecting Italy, Greece, Cyprus, Turkey and Israel. Throughout these countries and specifically in the cities of Catania, Athens (Metamorfofis and Koropi), Chania and Istanbul, our company has privately owned Data Centers. Sparkle Greece manages and operates the whole infrastructure within Greece, which comprises the backbone as well as three Data Centers: in Metamorfofis and Koropi in Athens and in Chania in Crete.

**about Sparkle**

Sparkle is a leading global service provider offering a full range of IP, Data, Cloud, Data Center, Mobile Data and Voice solutions designed to meet the everchanging needs of Internet Service Providers, OTTs, Media & Content Players, Application Service Providers, Fixed and Mobile Operators as well as Multinational Corporations. Thanks to a state-of-the-art global backbone of around 540,000 km of fiber and through an extensive worldwide commercial presence distributed over 34 countries, Sparkle ranks #10 for voice traffic and #7 for IP globally. Through a rich portfolio of services, a cutting-edge network based on the latest technologies, a globally distributed sales force and advanced customer care capabilities, Sparkle is able to fulfill its mission of providing customers with top-performing and tailored solutions worldwide. With a truly global dimension and a local outlook, Sparkle stays close to its customers to understand their needs and ensure they receive the very best care.

**Connectivity and Data Centers of unparalleled quality, power and security**

## Value Proposition

Communication should be uninterrupted. Continuous. 24 hours a day, 365 days a year, with the highest technology and utmost safety. This is the principle belief of Sparkle Greece since its founding in 2001.

Sparkle Greece offers cloud and colocation services, business continuity and disaster recovery as well as telecommunications connectivity.

It has its own Data Centers, which have been designed and manufactured in compliance with the most advanced international standards, in Athens and Chania, as well as a proprietary fiber optic network that connects all of its facilities.

Sparkle Greece offers its services to company clients and telecom providers, both domestic and foreign, answering to all their needs with tailor-made solutions.

## Description

Sparkle's Greece Data Centers encompass an area of more than 8,000 m<sup>2</sup> and are situated in Koropi and Metamorfosis in Attica and in Chania on the island of Crete.

We offer a wide range of state-of-the-art services including colocation with first and second level support, networking, managed hosting, cloud services, storage, disaster recovery as well as many others.

Hosting your computing and/or telecommunications system in one of Sparkle's Greece sites provides fast, reliable and cost-efficient connectivity options to other telecommunications providers, as well as to your customers.

Using 2N system back-up throughout each building, our infrastructure is designed and built to meet the most advanced international standards.

Sparkle Greece has been certified with ISO-9001:2015 and ISO/IEC-27001:2013 from Lloyd's, certificates that are related to planning and selling colocation services, disaster recovery services and capacity.

It has also been certified for ISO 14001 and PCI-DSS.

## Benefits

 **SPACE**

8,000 m<sup>2</sup>

of customer space, full rack or rack units, custom cabinets & cages

 **COOLING**  
Temperature & humidity monitored and controlled with an

AVAILABILITY OF

technical support and continuous monitoring, help desk available in Greek and English

## Services Provided

- Top-class integrated IaaS, PaaS and SaaS services bundled with Sparkle's connectivity
- Enhanced Colocation/Housing Solutions
- Enhanced Physical and Virtual Hosting
- Support Services including monitoring, backup, storage, security, operating systems and application management
- Disaster Recovery
- Direct access to Sparkle Cloud Solutions and to the major Cloud Players throughout the world (e.g. AWS, Microsoft Azure, Google)

## Always Evolving: What's Next

The construction of a fourth Data Center, whose entry into service is scheduled for early 2021, will provide the country with one of the largest and most advanced "green" Data Centers in Europe. Located in the Metamorfosis area in Attica, the new Tier III Data Center will offer 6,000 m<sup>2</sup> of colocation space and feature the latest energy-efficient power and cooling systems available in Greece and in the Balkan area, with a carbon footprint reduction of around 28,000 tons per year. The executive project has obtained the DD TIER III Uptime Institute Certification while the LEED Certification process is underway.
